THE PHILOSOPHICAL MAGAZINE

EDITOR
PROFESSOR SIR NEVILL MOTT, M.A., D.Sc., F.R.S.

EDITORIAL BOARD
SIR LAWRENCE BRAGG, O.B.E., M.C., M.A., D.Sc., F.R.S.
SIR GEORGE THOMSON, M.A., D.Sc., F.R.S.
W. H. TAYLOR, M.A., D.Sc.

VOL. XI.—EIGHTH SERIES

JANUARY—JUNE 1965

LONDON:
TAYLOR & FRANCIS LTD, RED LION COURT, FLEET STREET, E.C 4

"Meditationis est perscrutari occulta; contemplationis est admirari perspicua.... Admiratio generat quæstionem, quæstio investigationem, investigatio inventionem."—*Hugo de S. Victore.*

——"Cur spirent venti, cur terra dehiscat,
Cur mare turgescat, pelago cur tantus amaror,
Cur caput obscura Phœbus furrugine condat,
Quid toties diros cogat flagrare cometas,
Quid pariat nubes, veniant cur fulmina cœlo,
Quo micet igne Iris, superos quis conciat orbes
Tam vario motu."

J. B. Pinelli ad Mazonium

nos. 109-11

CONTENTS OF VOL. XI. Nos. (109–114)

(EIGHTH SERIES)

NUMBER 109—JANUARY

PAGE

Polymer Molecular Structure and Mechanical Properties. By J. Roberts, Ministry of Aviation, Explosives Research and Development Establishment, Waltham Abbey, Essex 1

Growth of Epitaxial Silicon Layers by Vacuum Evaporation. II. Initial Nucleation and Growth. By G. R. Booker, Cavendish Laboratory, University of Cambridge, and B. A. Unvala, Engineering Laboratory, University of Cambridge 11

Mechanism of Secondary Crystallization of Polymethylene. By M. Gordon and I. H. Hillier, Chemistry Department, Imperial College of Science and Technology, Imperial Institute Road, London, S.W.7 31

On Pointed Minima in the Interfacial Energy of Bicrystal Systems. By J. C. du Plessis and J. H. van der Merwe, University of Pretoria, Pretoria, South Africa 43

Neutron Irradiation Damage in Molybdenum. By M. E. Downey and B. L. Eyre, Metallurgy Division, A.E.R.E., Harwell, Berks 53

The Effect of Temperature on the Deformation Modes of the ζ Copper–Germanium Phase. By P. H. Thornton, Mellon Institute, 4400 Fifth Avenue, Pittsburgh 13, Pa., U.S.A. 71

Atomic Mechanisms for the Transport of Charge by Dislocations in NaCl Type Crystals. By R. W. Whitworth, Department of Physics, University of Birmingham 83

The Thermal Equilibrium Shape and Size of Holes in Solids. By R. S. Nelson, D. J. Mazey and R. S. Barnes, Metallurgy Division, A.E.R.E., Harwell, Berks 91

Diffraction Contrast from Precipitates in Type I Diamonds. By P. F. James and T. Evans, J. J. Thomson Physical Laboratory, Whiteknights Park, Reading, Berkshire, England 113

Deduction of the Interatomic Potential in Aluminium from Ion Range Measurements. By D. P. Corkhill and G. Carter, Department of Electrical Engineering, University of Liverpool 131

The Effects of Fast Neutron Irradiation on the Repeated Yielding Characteristics of a Copper–Tin Alloy. By B. Russell, Department of Mining and Metallurgical Engineering, University of Queensland 139

A Theory of the Electrical Properties of Liquid Metals. III. The Resistivity of Binary Alloys. By T. E. Faber and J. M. Ziman, Cavendish Laboratory, University of Cambridge 153

Correspondence :

Magnetic Properties of Copper Acetate at Low Temperatures. By Bhagawati Charan Guha, Department of Pure Physics, University of Calcutta, Calcutta 175

The Displacement of a Linear Array of Dislocations by an Applied Stress. By R. L. Woolley, C.E.G.B., Berkeley Nuclear Laboratories, Berkeley, Gloucestershire 179

Aluminium Single Crystals with very Low Dislocation Densities. By Bjarne Nøst, Institute of Physics, University of Oslo, Blindern, Norway 183

PAGE

Derivation of Creep Constants from Measurements of Relaxation Creep in Springs. By F. D. Boardman, Dounreay Experimental Reactor Establishment, Dounreay, Caithness 185

Void Growth during Secondary Creep. By W. P. Davies and B. Wilshire, Metallurgy Department, University College, Swansea 189

Strain-hardening Relationships in Polycrystalline Aluminium. By F. P. Bullen and C. B. Rogers, Aeronautical Research Laboratories, Australian Defence Scientific Service, Melbourne, Australia. 191

On the Essential Identity of the Amplification of Longitudinal Plasma Waves and the Negative Absorption of Čerenkov Radiation in an Electron Stream. By V. L. Ginzburg and V. V. Zheleznyakov, P. N. Lebedev Physical Institute, Academy of Sciences of the USSR, Moscow 197

Diffraction Contrast Effects from Stacking Faults with Phase Angle π. By C. M. Drum, A.E.R.E., Harwell, England, and M. J. Whelan, Cavendish Laboratory, University of Cambridge, England 205

Erratum 213

Reviews of Books 214

NUMBER 110—FEBRUARY

Edge Dislocations Dissociated in {112} Planes and Twinning Mechanism of B.C.C. Metals. By K. Ogawa, Department of Metallurgy, University of Cambridge 217

The Magnetic and Thermal Properties of some Aluminium-rich Binary Alloys. By H. J. Blythe, Department of Physics, The University, Sheffield and T. M. Holden, M. Dixon and F. E. Hoare, Department of Physics, The University, Leeds 235

Orientation Dependence of Energy Dissipation During Plastic Deformation of F.C.C. Crystals. By Yoshinao Nakada, Division of Engineering and Applied Physics, Harvard University, Cambridge, Mass 251

Oriented Growth of Semiconductors. I. Orientations in Gallium Arsenide Grown Epitaxially on Germanium. By H. Holloway, K. Wollmann and A. S. Joseph, Philco Research Laboratory, Blue Bell, Pennsylvania, U.S.A. 263

Interstitial Loops in Neutron Irradiated Molybdenum. By J. D. Meakin and I. G. Greenfield, The Franklin Institute Laboratories, Philadelphia 3, Pennsylvania 277

An Investigation of Thermal Spikes by Studying the High Energy Sputtering of Metals at Elevated Temperatures. By R. S. Nelson, Metallurgy Division, A.E.R.E., Harwell, Berks 291

Magnetic Properties of Dispersed Magnetite Powders. By L. G. Parry, Physics Department, University of Newcastle upon Tyne 303

Intersecting Faults on Basal and Prismatic Planes in Aluminium Nitride. By C. M. Drum, Atomic Energy Research Establishment, Harwell 313

Orientation Polarization of Defect Pairs in Crystals. By I. M. Boswarva and A. D. Franklin, Theoretical Physics Division, U.K.A.E.A. Research Group, Atomic Energy Research Establishment, Harwell 335

On the Structure of Coated Diamonds. By Y. Kamiya and A. R. Lang, H. H. Wills Physics Laboratory, University of Bristol 347

PAGE

The Mechanical Properties of Reactor Graphite. By W. N. Reynolds, Metallurgy Division, U.K.A.E.A. Research Group, Atomic Energy Research Establishment, Harwell 357

The Absorption Spectra and Irradiation of Plastically Deformed Diamond. By C. Phaal, Adamant Research Laboratory, Crown Mines, Johannesburg, South Africa 369

Non-local Dielectric Screening in Metals. By A. O. E. Animalu, Cavendish Laboratory, Cambridge 379

Plastically Induced Crack Growth in Iron–3% Silicon Monocrystals. By A. S. Tetelman and T. L. Johnston, Scientific Laboratory, Ford Motor Company, Dearborn, Michigan 389

The Changes in Internal Friction during the Recrystallization of Iron. By P. M. Robinson and P. N. Richards, Central Research Laboratory, John Lysaght (Australia) Ltd., Newcastle 2N, N.S.W., Australia 407

Correspondence:

A Refining Effect in Super Purity Aluminium. By K. Førsvoll, Institute of Physics, University of Oslo, Blindern, Norway 419

On the Formation of {012} Loops in Quenched Aluminium. By B. Hudson and M. J. Makin, Metallurgy Division, A.E.R.E., Harwell 423

Dislocation Arrangements in Fatigued Iron. By J. T. McGrath and W. J. Bratina, Ontario Research Foundation, Toronto, Ontario, Canada 429

An Effect of Fast Neutron Irradiation on the Polishing of Diamond. By Eileen M. Wilks, Clarendon Laboratory, Oxford 433

Reviews of Books 437

NUMBER 111—MARCH

Correlation of Temperature and Grain Size Effects in the Ductile–Brittle Transition of Molybdenum. By E. M. Passmore, ManLabs, Inc., Cambridge, Massachusetts 441

Intergranular Fracture of Magnesium Oxide Bi-crystals. By R. McPherson, Industrial Research Section, Metallurgy Department, University of Melbourne, Australia, and H. N. Sinha, Baillieu Laboratory, Metallurgy Department, University of Melbourne, Australia 451

Stacking-fault Tetrahedra in Deformed Face-centred Cubic Metals. By M. H. Loretto, L. M. Clarebrough and R. L. Segall, Division of Tribophysics, Commonwealth Scientific and Industrial Research Organization, University of Melbourne 459

Self-diffusion in Chromium. By J. Askill and D. H. Tomlin, Department of Physics, University of Reading, Berkshire, England 467

The Elasticity of Polycrystalline Graphite. By R. L. Woolley, C.E.G.B., Berkeley Nuclear Laboratories, Berkeley, Gloucestershire 475

The Lattice Constants and Magnetic Anisotropy Constants of Electrodeposited Single Crystal Films of Hexagonal Close-packed Nickel. By J. G. Wright and J. Goddard, Sir John Cass College, Jewry Street, Aldgate, London, E.C.3 485

Electron Microscopy and Diffraction of Synthetic Corundum Crystals. I. Pure Aluminium Oxide Grown by the Verneuil Process. By D. J. Barber and Nancy J. Tighe, National Bureau of Standards, Washington, D.C. 495

PAGE

Neutron-Acoustic Irradiation of Aluminium Single Crystals. By B. Langenecker and C. W. Fountain, Michelson Laboratory, Research Department, U.S. Naval Ordnance Test Station, China Lake, California .. 513

The Vacancy Formation and Motion Energies in Gold. By C. P. Flynn, J. Bass and D. Lazarus, Materials Research Laboratory and Department of Physics, University of Illinois, Urbana, Illinois 521

Some Aspects of Solute Segregation to Stacking Faults. By M. L. Rudee and R. A. Huggins, Department of Materials Science, Stanford University, Stanford, California 539

The Magnetic Susceptibility of Scandium. By W. E. Gardner and J. Penfold, Solid State Physics Division, A.E.R.E., Harwell, Berks 549

Size-dependent Thermal Conductivity in Aluminium Films. By T. Amundsen and T. Olsen, Institute of Physics, University of Oslo, Oslo 3, Norway 561

The Nucleation, Growth and Microstructure of Electrodeposited Gold Films on (111) Silver Substrates. By E. W. Dickson, M. H. Jacobs and D. W. Pashley, Tube Investments Research Laboratories, Hinxton Hall, Cambridge 575

Moiré Patterns and Coherent Double-positioning Boundaries in {111} Epitaxial Gold Films. By M. H. Jacobs and M. J. Stowell, Tube Investments Research Laboratories, Hinxton Hall, Cambridge 591

The Forest Dislocation as a Source of Cross-slip. By R. Bullough and J. V. Sharp, A.E.R.E., Harwell 605

Correspondence:

Magnetic Susceptibility of Sodium at Low Temperatures. By E. W. Collings, The Franklin Institute Laboratories, Philadelphia, Pa.. 617

Irradiation of Uranium with Neutrons at 4·5°K. By G. Burger, K. Isebeck and H. Wenzl, Laboratorium für Technische Physik der Technischen Hochschule, München, Germany, and J. C. Jousset and Y. Quéré, Centre d'Études Nucléaires, Fontenay-aux-Roses, France 621

A Note on the Transformation in Non-stoichiometric Rutile. By A. Eikum and R. E. Smallman, Department of Physical Metallurgy, University of Birmingham 627

The Relative Energies of Intrinsic and Extrinsic Stacking Faults and the Influence of the Suzuki Effect Thereon. By Doris Kuhlmann-Wilsdorf, School of Engineering and Applied Science, University of Virginia, Charlottesville, Virginia 633

Nature and Migration of Pores in Quenched Uranium Dioxide. By K. H. G. Ashbee, C.E.G.B., Berkeley Nuclear Laboratories, Glos.. 637

Cavity Formation at Cleavage Cracks in KBr : Sn. By R. Illingworth, Department of Electron Physics, University of Birmingham, Edgbaston, Birmingham 643

Wave Propagation in a Magnetoelectric Medium. By R. Fuchs, Institute for Atomic Research and Department of Physics, Iowa State University, Ames, Iowa 647

A Study of Fission Fragment Damage in Tungsten with the Field-ion Microscope. By K. M. Bowkett, Department of Metallurgy, Cambridge University, L. T. Chadderton and H. Norden, Physics and Chemistry of Solids, Cavendish Laboratory, Cambridge University, and B. Ralph, Department of Metallurgy, Cambridge University 651

NUMBER 112—APRIL

PAGE

A Theory of the Electrical Properties of Liquid Metals. IV. Quantitative Calculations of Resistivity and Thermoelectric Power. By LORNA J. SUNDSTRÖM, Cavendish Laboratory, Cambridge 657

Thermal Conductivity of Liquid Semiconductor Thallium–Tellurium Solutions. By C. E. MALLON and M. CUTLER, General Atomic Division of General Dynamics Corporation, John Jay Hopkins Laboratory for Pure and Applied Science, San Diego, California 667

On the Theory of Ferroelectricity and Anharmonic Effects in Crystals. By R. A. COWLEY, Crystallographic Laboratory, Cavendish Laboratory, Cambridge 673

On the Annealing of Quenched-in Vacancies in Gold. By J. A. YTTERHUS and R. W. BALLUFFI, Materials Research Laboratory and Department of Mining, Metallurgy and Petroleum Engineering, University of Illinois, Urbana, Illinois 707

An Electron Microscope Study of Radiation Damage in Single Crystal Graphite. By C. BAKER and A. KELLY, Department of Metallurgy, University of Cambridge 729

Structural and Magnetic Studies in Hematite Single Crystals. By I. SUNAGAWA, Geological Survey of Japan, Hisamoto-cho 135, Kawasaki-shi, Japan, and P. J. FLANDERS, The Franklin Institute Laboratories, Philadelphia, Pennsylvania 747

Optical Absorption Features Associated with Paramagnetic Nitrogen in Diamond. By H. B. DYER and F. A. RAAL, Diamond Research Laboratory, Johannesburg, and L. DU PREEZ, and J. H. N. LOUBSER, Department of Physics, University of the Witwatersrand, Johannesburg. 763

Effect of Coherency Strain Fields on the Flow Stress of a Copper–3·12% Cobalt Alloy. By V. A. PHILLIPS, General Electric Research Laboratory, Schenectady, New York 775

The Yield Curve and the Compressive Strength of Polycrystalline Graphite. By R. L. WOOLLEY, C.E.G.B., Berkeley Nuclear Laboratories, Berkeley, Gloucestershire 799

Grouping of Pinning Points on Dislocation Lines. By GEORG ALEFELD, John Jay Hopkins Laboratory for Pure and Applied Science, General Atomic Division of General Dynamics Corporation, San Diego, California 809

The Free Energy of a Pinned Dislocation. By CHARLES L. BAUER, Department of Metallurgical Engineering, Carnegie Institute of Technology, Pittsburgh, Pennsylvania 15213 827

The Temperature Dependence of the Characteristic Thermopowers of Zinc, Gallium, Germanium and Arsenic in Copper and Silver. By R. S. CRISP, and W. G. HENRY, Division of Applied Chemistry, National Research Council, Ottawa, Canada 841

Precession of Flux in Superconducting Indium. By WARREN DESORBO, General Electric Research Laboratory, Schenectady, New York 853

Band Structure of α-brasses. By A. H. LETTINGTON, Solid State Physics Division, A.E.R.E., Harwell 863

PAGE

Correspondence:

X-ray Study of the Effect of Internal Oxidation in Dilute Cu Alloy. By K. NAKAJIMA, Toyota Central Research and Development Labs., Inc., Nagoya, Japan, and T. HIKAGE, The Research Institute for Iron, Steel and Other Metals, Tohoku University, Sendai, Japan.. 871

Errata 875

Reviews of Books..... 877

NUMBER 113—MAY

Dislocation Loops in Irradiated Iron. By B. C. MASTERS, Central Electricity Generating Board, Berkeley Nuclear Laboratories, Berkeley, Gloucestershire 881

Nucleation of Deformation Twins at Slip Plane Intersections in B.C.C. Metals. By R. PRIESTNER and W. C. LESLIE, Edgar C. Bain Laboratory for Fundamental Research, United States Steel Corporation, Research Center, Monroeville, Pennsylvania..... 895

The Mechanisms of Irradiation Creep in Graphite. By R. V. HESKETH, Berkeley Nuclear Laboratories, Berkeley, Gloucestershire 917

Irradiation Creep in Graphite at 40°C. By R. V. HESKETH, Berkeley Nuclear Laboratories, Berkeley, Glos..... 929

The Effect of Sub-lattice Order in Binary Alloys with One Magnetic Components. I. By G. M. BELL, Mathematics Department, Chelsea College of Science and Technology and D. A. LAVIS, Mathematics Department, Manchester College of Science and Technology 937

Defects Formed from Excess Vacancies in Aluminium. By G. DAS and J. WASHBURN, Inorganic Materials Research Division, Lawrence Radiation Laboratory and Department of Mineral Technology, College of Engineering, University of California, Berkeley, California..... 955

The Effects of Porosity and Impurity on X-ray Integrated Intensities for Powders. By M. J. COOPER, Crystallographic Laboratory, Cavendish Laboratory, Cambridge, England 969

Formation of Grain Boundaries during Diffusion between Single Crystal Films of Gold and Palladium. By J. W. MATTHEWS and J. L. CRAWFORD, Department of Physics, University of the Witwatersrand, Johannesburg, South Africa 977

The Domain Structure of Ferromagnetic Films Electrodeposited on Rolled Copper Substrates. By G. A. JONES, D. P. OXLEY and R. S. TEBBLE, Department of Physics, University of Sheffield..... 993

Tripyramids and Associated Defects in Epitaxial Silicon Layers. By G. R. BOOKER, Cavendish Laboratory, University of Cambridge, Cambridge, England..... 1007

The Migration of Interstitial Atoms in Gold. I. Experimental. By J. A. VENABLES, Materials Research Laboratory and Department of Physics, University of Illinois, Urbana, Illinois and R. W. BALLUFFI, Materials Research Laboratory and Department of Mining, Metallurgy and Petroleum Engineering, University of Illinois, Urbana, Illinois 1021

PAGE

The Migration of Interstitial Atoms in Gold. II. Analysis and Interpretation of Experiments. By J. A. Venables, Materials Research Laboratory and Department of Physics, University of Illinois, Urbana, Illinois and R. W. Balluffi, Materials Research Laboratory and Department of Mining, Metallurgy and Petroleum Engineering, University of Illinois, Urbana, Illinois 1039

A New Use of the Kronig–Kramers Relations in Nuclear Magnetic Resonance. II. By G. J. Troup and J. Walter, Department of Physics, Monash University, Clayton, Victoria, Australia 1059

The Interaction of Cleavage Cracks with Inhomogeneities in Sodium Chloride Crystals. By C. T. Forwood and A. J. Forty, H. H. Wills Physics Laboratory, University of Bristol 1067

Correspondence :

Step-growth on Single Crystals of Ice. By P. V. Hobbs and W. D. Scott, University of Washington, Seattle..... 1083

Observation of Dislocation Loop Arrays in Fatigued Polycrystalline Pure Iron. By R. P. Wei and A. J. Baker, Applied Research Laboratory, United States Steel Corporation, Monroeville, Pennsylvania 1087

Growth Mechanism of Small Ice Crystals. By J. Hallett, Physics Department, Imperial College, London..... 1093

Reviews of Books 1095

NUMBER 114—JUNE

Growth of Magnesium Oxide during Neutron Irradiation. By B. S. Hickman and D. G. Walker, Materials Physics Section, Australian Atomic Energy Commission, Research Establishment, Lucas Heights, Sydney, N.S.W..... 1101

Faulted Dislocation Loops in Quenched Aluminium. By J. W. Edington and R. E. Smallman, Department of Physical Metallurgy, University of Birmingham..... 1109

Thermal Expansion at Low Temperatures of Hexagonal Metals: Mg, Zn and Cd. By R. D. McCammon and G. K. White, C.S.I.R.O., Division of Physics, Sydney, Australia..... 1125

Generalized Large Deformation Behaviour for Face-centred Cubic Solids: Nickel, Aluminium, Gold, Silver and Lead. By James F. Bell, The Johns Hopkins University, Baltimore, Maryland, U.S.A..... 1135

Atomic Diffusion of Mercury in Gold. By A. J. Mortlock and A. H. Rowe, Solid State Physics Division, Atomic Energy Research Establishment, Harwell, Berks..... 1157

On the Effect of the Crystallization Temperature on the Habit and Fold Length of Polyethylene Single Crystals. By T. Kawai and A. Keller, H. H. Wills Physics Laboratory, University of Bristol, Bristol, England 1165

The Annealing of Vacancies in Dilute Alloys. By R. E. Howard and A. B. Lidiard, Theoretical Physics Division, A.E.R.E., Harwell, Berkshire 1179

The Diffusion of Supersaturated Concentrations of Vacancies in Dilute F.C.C. Alloys. By M. de Jong, Natuurkundig Laboratorium, Universiteit van Amsterdam, Amsterdam, The Netherlands..... 1189

On a Cracked Dislocation in an Anisotropic Elastic Medium. By W. T. Chen, IBM, Systems Development Division, Endicott, N.Y..... 1207

PAGE

The Peach–Koehler Equation for the Force on a Dislocation Modified for Hydrostatic Pressure. By J. WEERTMAN, Department of Materials Science, Technological Institute and Department of Geology, and Materials Research Center, Northwestern University, Evanston, Illinois. 1217

Yield Phenomena in Polycrystalline Copper. By A. L. TITCHENER and G. J. DAVIES, School of Engineering, University of Auckland, New Zealand 1225

The Structure of Gold Films Grown in Ultra-high Vacuum on Sodium Chloride Substrates. By J. W. MATTHEWS and E. GRÜNBAUM, University of Virginia, Charlottesville, Virginia 1233

Equiatomic Transition Metal Alloys of Manganese. IV. A Neutron Diffraction Study of Magnetic Ordering in the PtMn Phase. By A. F. ANDRESEN, Institutt for Atomenergi, Kjeller, Norway, A. KJEKSHUS and R. MØLLERUD, Kjemisk Institutt A, Universitetet i Oslo, Blindern, Norway, and W. B. PEARSON, Division of Pure Physics, National Research Council, Ottawa, Canada 1245

Neutron Irradiation Strengthening in Copper Single Crystals. By T. J. KOPPENAAL, Metallurgy Division, Argonne National Laboratory, Argonne, Illinois 1257

Magnetic Properties of Hematite Single Crystals. By P. J. FLANDERS, The Franklin Institute Laboratories, Philadelphia, Pennsylvania, and J. P. REMEIKA, Bell Telephone Laboratories, Incorporated, Murray Hill, New Jersey 1271

Electron Optical Study of Effects associated with Partial Inversion in a Silicate Phase. By J. D. C. MCCONNELL, Department of Mineralogy and Petrology, Downing Place, Cambridge 1289

Two-dimensional Defects in Silicon after Annealing in Wet Oxygen. By G. R. BOOKER, Cavendish Laboratory, University of Cambridge, Cambridge, England, and R. STICKLER, Research and Development Centre, Westinghouse Electric Corporation, Pittsburgh, Pennsylvania, U.S.A. 1303

Correspondence:

Habit Planes between Phases in the Systems NaCl–NaF and LiF–NaF. By P. TRUELOVE and A. HELLAWELL, Department of Metallurgy, Oxford University 1309

Observations on Dislocation Nodes in Silicon. By G. R. BOOKER and L. M. BROWN, Cavendish Laboratory, University of Cambridge 1315

Reviews of Books 1321

Subject Index 1325

Index of Authors (with Titles) 1322
